

Managed Pay

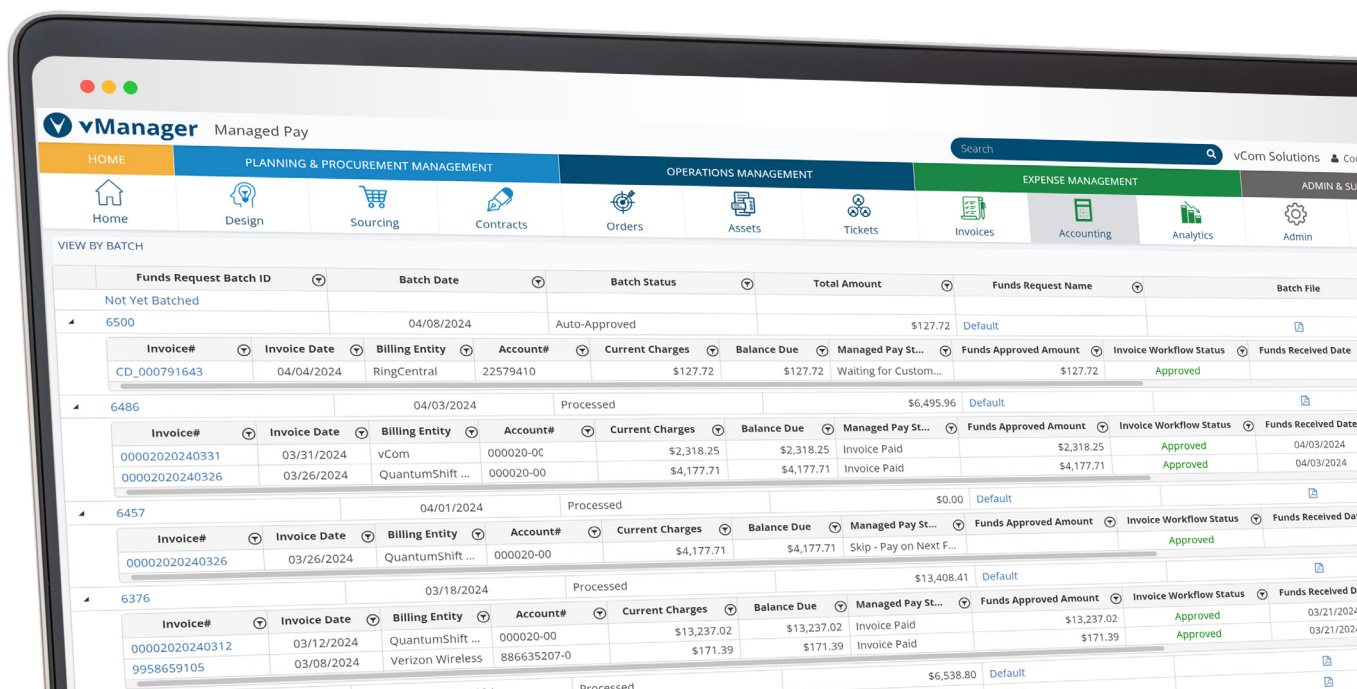

Enjoy a streamlined payment process that's centralized, transparent, and hassle-free

Managing multiple invoices from vendors—like network, mobile, SaaS, UCaaS, and cloud services—can be a real hassle. Each vendor typically has its own payment portal, creating a fragmented and time-consuming process. This increases the risk of missed or late payments, leading to service disruptions and fees, while also complicating tracking.

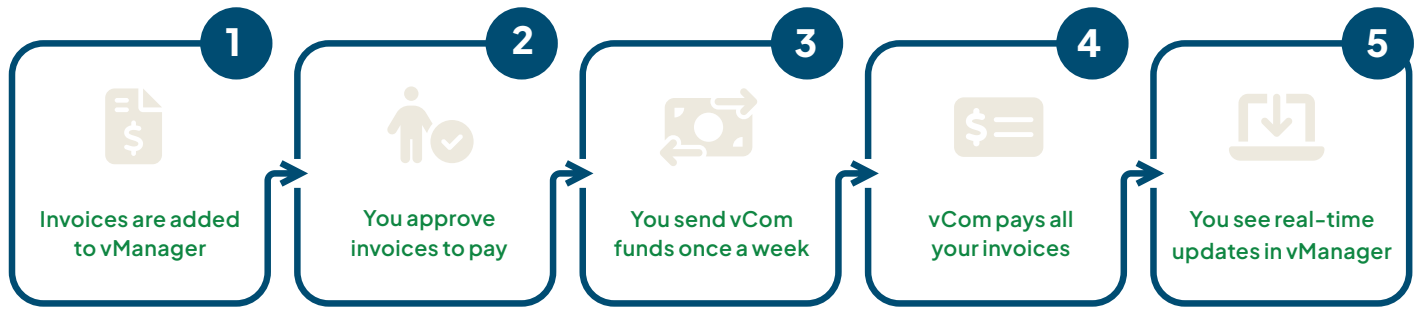

That's where our Managed Pay all-in-one payment management solution comes in. With vCom Solutions' integrated system, you can consolidate all your vendor invoices into a single platform. Simply transfer funds to us, and we handle the rest.

Our solution streamlines your financial processes, reduces errors, and simplifies payment management. Enjoy centralized processing, full visibility into payment details, and dedicated support during setup to meet your needs.

Say goodbye to payment headaches and focus on what truly matters—growing your business.

HOW MANAGED PAY WORKS

BENEFITS

✓ Time Savings

Reduce the time spent managing and paying invoices across multiple platforms by consolidating everything into one streamlined process.

✓ Cost Efficiency

Avoid late payments and associated fees, while also minimizing the administrative overhead involved in handling multiple payments.

✓ Improved Cash Flow Management

With full visibility into all payments, you can better manage your cash flow, predict expenses, and optimize your financial planning.

✓ Enhanced Vendor Relationships

By ensuring timely payments, you maintain strong relationships with your vendors, reducing the risk of service disruptions.

✓ Peace of Mind

Let vCom take on the responsibility of managing payments, so you can focus on running your business with confidence.

*Additional banking and transaction fees may apply.
